

2012 Technology.....What Do I REALLY Need?

In order to stay competitive in the ever growing global marketplace, we need to get the most value and efficiencies from our IT Spend. Effective organizations are starting to shift IT Spend from Core Infrastructure such as Routers, Switches Servers.....to items such as Mobility Solutions, Cloud Strategies and Collaboration.

Step One: Establish Efficient Core Infrastructure

- Virtualization
- Cloud Strategy
- Bandwidth

Step Two: Define Business Requirements for IT to meet the needs of the organization

- We need to reduce turnover.....better collaboration
- Recruit new talent.....social media, mobile workforce
- Create more creative, collaborating team.....SharePoint, Lync
- More Accurate data, faster, for decision makers....new system, SRS, SharePoint

Hot Topics that may or may not add value:

- SharePoint
- Lync
- Mobile Apps and Devices
- Cloud

Discussion Facilitated by Gerald Urlaub and Brad Maczkowicz
